# Mines and Prospects--Furnaces and Mills

# PROF. S. F. EMMONS DROPS INTO TOWN

The Distinguished Geologist and Eminent Mining Man Seeking New Fields for Survey.

A distinguished visitor in the city at present and one for whom the miner of very land has a cordial recognition, is Prof. S. F. Emmons, the eminent head of the United States geological curves whose discourses upon the geology and clinics upon the occurrence of orce in every samp of preminence have done so much to instruct the clinic Prof. Emments, who was received by many of the mare prominent engaged in mining during the day, is devoting himself during the heat of August days to observations in the mining cumps, and on his return to the department at Washington will no doubt submit a number of recommendations that must be followed by additional researches in the disgings. Indeed, it is the policy of the department, he intimated, to take up the ends of old threads and to bring them down to daie, if they shall not be carried into the future, that the youngster may have something to intelligently guide him in his exploratory work. At no period in the history of the survey, indeed, has it been under a more thorough organization, and with a crop of new camps appealing to it, the work of the next year should be most extensive. Of the report on Bingham which has been most carefully compiled after as carefull researches, and which promises to greatly semplify the lessons there. Frof Emmons says, it is now in the hands of the editors," and will be put through the preess as rapidly as facilities shall permit. The distinguished visitor would not, pleading the rule of the department, anticipate the lessons contained in the report, which he hopes soon to see in general circulation.

The report on Park City, which afforded a most instructive and a most interesting field, also be well in hand, the feature of observations upon that matchless camp, perhaps, that which deals with its faultings. These Prof. Emmons would not discuss yesterday, but the discourse promises much of value to the miner. The eminent gentleman will remain in this locality for several days, and mining men generally will exert themselves that his soand on his return to the department at Washington will no doubt submit a

several days, and mining men generally will exert themselves that his so-journ shall be made pleasant. That the copper-bearing purphyries of Bingham bave been made to yield commercial results, does not surprise the visitor, so he had occasion to inquire into the zone and its possibilities as a source of copper, gold and eliver on a previous viett.

### MORE GOLD DOLLARS.

Another Consignment Dumped Into the Pockets of Old Mammoth.

The management of the Manusoth of Tintic opened the week in the ore market with two more consignments, of gold-hearing ore containing 190 tons, and from which another handsome she from which another handsome check was sold on controls showing as much as \$74 gold with 5.2 sunces silver for the becond-class on an unpire showing \$58 gold and 4.5 ounces silver. Meanwhile there are several more lots at the sampler with which to await the sampler with which to swell the sampler of August one. to swell the earnings of August, and when the dividend is passed around by Cashier Wilkinson on Monday next there will be another piece of gold by add to surplus, which is steadily in-

### GOT ANOTHER OPTION.

#### bull Run Basin Gold Properties Acquired by Local Talent.

With another option on Nevada properties, the merits of which were demonstrated long ago and which takes him as an active figure into Buil Run Basin, fifteen miles south of Mountain City, ifteen miles south of Mountain City, into which latter he has blazed the way for Samuel Newhouse, D. H. Peery and others, Edmund H. Mead came in from California yesterday and will leave for the West again in a short time. The proposition taken hold of by him at Bull Run is one in which the ledges are large with good values in gold and while it has been mined to a depth of 20g feet it remains practically a youngster.

Mr. Mend reports intense interest in rnia over the new camp at Cac tus Peak, Ney, which began its boson on a \$42,000 gold assay, and which is welve miles northeast of Goldfield, Many are decking there and reports are all premonitory of big things.

### MINERAL IN ALBION.

#### Report From Camp That a Change Is Taking Place in Tunnel.

A report from Alta last night indicutes that a change is taking place in the long tunnel on the properties of the Albion Mining company, and while It Is incomplete, something of a most interesting nature is promised. A miner who was down from camp during the evening says a fastire has been taxonistered and that considerable mineral is exposed.

Alex Cobath, supermisedent of the Quiney, who arrived from Alta during the afternoon, rays that while he learned nothing definite about the report, a charge has been due for some days. He reports the campaign at the Quincy without material change.

### MERCUR'S GOLD OUTPUT.

#### July's Crop Shows Material Gains Over the Previous Month.

Through channels not remete from atticial sources, it is learned that the bullion product of the Con. Mercur for July reveals an increase of about \$10,000 ever the previous month, and that it will exceed \$60,000, or \$2000 a day. Of the new ore body it is said that the values to which the battery rose about the 10th of last month are being main-tained, and that with this the man-August for even greater gains. The \$1.00 to \$3.00

tonnage being put through the plant continues quite uniform and the good news from under ground arrives at a period when an army of shareholders at home and abroad will appreciate it.

#### DAY ON 'CHANGE.

Daly West Again Weakens, With Con. Mercur in Good Demand.

The week on the mining exchange pened on the sale of 17,350 shares of stock, for which \$5485 was paid, and with the market again suffering from the oppressive heat, if not from son other causes. Daly West, which will ome forward on Monday next with the usual dividend, notwithstanding the paper policis that Boston has been firing, took a tumble during the after noon and sold down to \$15.50, although it was eagerly sought at \$14.25 at the opening, while Mammoth, which will hand out \$20,000 the middle of the month, was reduced to \$1.47. Con. Mercur was a firm attraction at 35 cents and Petro at 32%, while Century of the gold-bearing list was reduced to with Sacramento maintaining sirong position at 11%. Uncle Sam which has decided to pars around a few dimes for autumnal needs, ad-vanced rapidly to D4 cents, on which figure the present dividend of \$5000 affords an earning of 50 per cent, while New York made creepy gains on buy-ing orders, the day closing on the fol-

# RICHES OF NEWHOUSE ASTONISHED HIM

Secretary of the Company Examines the Ore Bodies of the Cactus Group of Mines.

While he came from the New York ffices with the assurance of every nining man who ever made an invenory of their assets that the Newhouse mines out of Frisco, this State, were among the most phenomenal in the story of the diggings, John Josten, secretary of the company, did not appreclate the enormity of their wealth until the personal examination on which he came West was completed, and he returned from camp Sunday morning. That he was astounded was the secretary's own confession, and yet, as a member of Mr. Newhouse's staff, he was present when the Highland Boy of Bingham began to astonish the world and to lay the foundation for a camp of copper the extent of whose re-sources is yet to be determined, at-though its output at this time is nearing 3000 tons of ore daily. Just as big as any of these levisthans of a camp with which his principal's name will be ever conspicuously associated are the Newbouse mines said Secretary Josten, and certainly, with the equipment completed, the relmburisment of the gentleman to whom the State is again indebted shall be upon a most gener-

The grading of the branch between Frisco and Newhouse was completed yesterday, said Mr. Josten, with two miles of rail now spiked and trains to be making time over it by the 18th of the present month. Mr. Josten, whose sofourn is being made an agreeable one by old friends in many ways, will leave for the trout streams tomorrow, ve-turning to the New York offices the last of the month to receive Mr. Newhouse, who will sail for home on the steamer Oceanic on September 7.

#### Johnny Bechtol and Son Make a Big Find in Alaska's Gulches.

A letter from Dawson City indicates that the dreams which took Johnny Bechtol and his sen into the camps of Alaska are about to be realized and that when they return it will be with the wealth of the average man who has sought that region. From Tauana, to which field Bechtel, Jr., transferred his researches a short time ago, a message quired a lease and bond some time ago. With this assurance the latter is now on his way to Tanana prepared to exer-

cise the option and with his son begin the active raising of gold. The Yukon World of Dawson, com-menting on the reward about which the Bechtols are finally locking their em-

the last trip of the Lavelle Young, Bechtol, Sr., had a letter from his son apprising him of the bond he had secured and giving all particulars relative to the claim in which he had so much confidence, so the telegram was not whelly unexpected. The claim was not been deepered. The claim is five above on Cleary creek. The bond was for but thirty days with the privilege of putting two holes to bedrock, the terms for a half interest in the full claim being \$6000, of which \$1500 was to be paid in cash and the balance on bedrock. bedrock. According to advices from Tanana, what is designated as the Chatham pay streak, has been en-countered which insures the find being a rich one. At the time young Eschool secured the bond it was thought he had fallen into a spap, as he was of-fered \$1000 for a relinquishment before the holes were begun.

That forture's finger has finally singled out the Bechtol cabin in the far North will be a source of much

### Still Quiet in Boston.

Special to The Tribune: BOSTON, Mass. Aug. 8.—Outside of the usual activity in Utah and Copper Range the Boston market was rather quiet as far as expect share, were con-cerned. These two issues continue to meaning the bulk of brading in the copper list. Local fusion as well as these copper shares were active and attent as expectably the good investment leaves which continued in case lent detreat. The market closed in good tone situationer & Wesks brokers, 12 State street, Boston, and 10 Wall street, New York, furnish the following quotation. # FOUND RICH ORES IN PIOCHE-NEVADA CON.

Judge Burton Arrives From the Old Camp With Samples of Rock From New Discovery.

With samples or ore identical in apearance and in metallic composition ith that from which the Raymond-Ely of Pioche, Nev., derived its multiplex millions, Judge John W. Burton me in from the properties of the Pioche-Nevada Con, at the Jamous old amp yesterday morning feeling that the future of the undertaking is now positively assured. At all events, the ompany is seeking the aid of no one. has money with which to discharge the final payment on its acquisitions, and then the means with which to make ertain connections preliminary to the active production of high-grade ore. The new ore, encountered while the Judge was at camp, tells its own story, the crystallized lead and chloride of sitver revealing those metals in sensa-tional abundance, while of this there are thirty inches, with at least six feet of milling ors, containing from 15 to 30 per cent lead, within a unit of silver for each of lead. Within a unit of silver for each of lead. The new ore was encountered at a depth of sixty feet in what is known as No. 2 Hausman shaft, the collar of which is 120 feet northwest of the Talisman, the two to be connected on the 100-foot level when active attailing will stoping will be inaugurated. In the Talisman shaft is also thirty inches of first-class ore, consisting of as many inches of solid galena, this ledge here to be crossent at once with a level to be extended to the wealth of the Hausman shaft. The management of the Pioche-Nevada Con, has now opened up the contact and demonstrated the ontact, a thorough knowledge of the erything now foretells a heavy produc

At the Gordon group, owned by Henry Lee, the County Recorder, and James Neebit, County Treasurer, and their associates, the management sunk on the ore ninety feet and is now following up an IS-inch streak, assays from which show from 60 to 75 per cent lead, with an average of about 100 ounces silver per ton. At the Gordon, which is located at Stampede Gap, the

Reports brought over by the miners from the E. & F., owned by Col. Ellis of this city, tell of a most grafifying condition there, says Judge Burton with more high-grade ore from it is The assays obained last night on the

Pioche-Nevada samples show 53.6 per cent lead, \$13.20 gold and 5.7 ounces of silver. The returns from the secondclass showed 20 per cent lend, \$3.60 gold and 7.7 ounces silver.

### STRUCK IT RICH.

#### Tunneled Into 8-Foot Vein in Clipper and Silver King Consolidated.

AMERICAN FORK, Aug. 8.-Frank Adams came down from the Clipper and Silver King Con. last evening. He reports that the company was received by Sechtol, Sr., on Juty 25 that rich pay had been encountered has completed the 120-foot tunnel which on a claim on which the former acwas run to strike two veins that merge. This tunnel proved to be a greater farge s-foot vein of ore. When Mr. Armstrong, the foreman, was seen at the mine a short time after the strike, he was too much excited to talk.

William Coats came down from the Outario mine in American Fork can-yon, where he reports things as look-ing well and that the mine force was

Joseph Householder left here this evening loaded with supplies for the Kal-amazoo mine in American Fork canyon, which is in active operation,

Perry Clarke and brother of Alpine came down from the Bog mine in American Pork canyon, near Silver Dipper, and reports that prospect as having some very high-grade ore.

### MORE BINGHAM COPPER.

#### New Product From Low-Grade Ores Makes Its Appearance. From his copper-bearing properties

at Eingham, John Rogers is now raising a class of ore that, at the Hogers mill in Bingham canyon, he is reducing to a concentrate which was yester-day marketed on controls showing as much as 25.6 per cent copper, \$2 gold and a small amount of silver. mined from one of the many interests embraced in the Rogers estate at Bingham, with which camp the Messrs. Rogers have long been identified.

### LITTLE SAID, MUCH DONE.

#### Eastern Comment on the Utah Mines as a Profitable Investment.

Commenting on the wealth that is go ing from this State into the cachemeres of the investor the Mining World of

of the investor the Mining World of Chicago says.

I'thi mines for the month of July made a spicially dividend record, they paying for shareholders nearly \$1,00.00. The Utah Consolidated heads the list with \$150,000. The United States company paid \$20,000 and the Silver King 100,000 Other dividend payers were as follows: Daly West \$2,000. Genuin-Keystone.
\$20,000 Grand Central, \$2,000, Mammeth, \$20,000 Annie Laurie, \$12,000, with several others for smaller shounds. There is less said about Ulah imnes than of other States, yet they may be depended upon to each month pay splendid profits to the fortunate owners.

### Decided on Millsite.

President E. L. White of the Bingham Mining company has been apending some weeks at the after property of the Mexico Consolidated Mining & Smolting company. In which he is largely interested, earst a Boaton publication. Mr. White has with him quite an array of mining and fogal talent, including the following. Dunean MacVichie. V. R. Sherroof, L. R. Rogers, and Frank C. Marchouse, all of Sail Lake City: Richard A. Furker of Denver, C. H. Hall of Butte, and H. Hagerman of Mexico.

Mr. White wires: "Have decided on the new mill site and believe that a combination of concentration and symble.
